

Website Manager Features

FEATURES OF THE WEBSITE MANAGER

The Website Manager allows you to change text on existing pages, and easily upload 1 or more photos at once turning them into stunning galleries of various types including photo, video, article, music, and products. The Website Manager is a powerful tool that comes with complete, personalized support.

FEATURES

- Very User-Friendly - if you can attach a photo to an email, or use a text editor like Microsoft Word, you can use our Website Manager.
- Change the text on existing pages like you would using a Microsoft Word Document. Click, and it's live on your website.
- Upload 1 or many photo images with a few clicks and the manager automatically lays out the gallery for you - no design necessary.
- Original images are held in the manager, download to your computer anytime.
- Add titles with a click.
- Add descriptions with a click.
- Move images from one gallery to another in batches or one at a time.
- Delete images in batches or one at a time.

- Un-publish and re-publish images in batches or one at a time (keep them in the manager, but disappear from the site.)
 - Rearrange images - simply drag and drop them into place in your gallery.
 - Change the size of the thumbnails.
 - Change the size of the enlargement images.
 - Add watermarks and place them anywhere on the image.
 - Change the # of columns.
 - Website Manager - See the Backend Manager
