

## 4 Design Options

### Your Choices

- Our Website Package - Offers you everything you need, using one of our 150+ templates. It saves you \$1000's of dollars on the design of your template without losing quality that would come with a custom design..

See Actual Examples of New Websites - [click here](#)

- Customizing a Template - Change or add elements in an existing template for low additional design fees.

- Convert Your Existing Website - For the same price as our low Website Package, you can take all of the content from your existing website, and we design it into one of our gorgeous templates. You then have a new website, with a very high-end look, and our Website Manager so you can control the site.

See Actual Examples of Converted Websites - [click here](#)

- Custom Design - We create a unique, custom template for you. Fees vary depending on the time needed to complete the template. Custom design work is paid for by the day, then the hour until completed.

Our Website Manager can be plugged into your new, converted or custom template so you can self-manage the site and expand it as you wish. Please see Website Manager Features in the right column for details. All Template Options above come with the same # of pages, and Gallery System as the Website Package. Pages beyond what is included in that package require additional fees. Please inquire.
